- 

# PALEOZOIC MINERAL SALTS

**PALEOZOIC MINERAL SALT** contains many natural substances including iodine, potassium, calcium, magnesium, iron and many other elements beneficial to human body.

### **3 major benefits of PALEOZOIC MINERAL SALTS**

- 1) *Release anions beneficial to the human body.*
- 2) **Effectively regulates the human body's metabolism.**
- 3) *Radiates far-infrared ray with the same frequency of human body.*

# ACTION PRINCIPLE

- **ANION MINERAL SALT TOOTHPASTE** is made through technologically integrating the paleozoic mineral salts with nanotechnology.
- When brushing your teeth, the mouth temperature and friction will activate toothpaste ingredients, resulting in water absorption, generating and melting anions.
- Anions will effectively remove the bacteria on the surface of enamel and form a protective layer around the teeth, preventing the teeth from the bacteria erosion & will enhance **the dental and gums** health
- Mineral salts provide natural mineral elements, promote the pro-biotic breeding in oral cavity and improve the blood circulation around the gums, hence cleaning teeth, strengthening teeth, inhibiting bacteria and removing bad breath, etc.

# V-SHINE WINSMILE ANION & MINERAL SALT TOOTHPASTE

**Welsmile** Anion Mineral Salt Toothpaste adopts the All-in-one teeth protecting and strengthening concept, integrates a variety of teeth protecting components to provide all-round teeth protecting, teeth strengthening and teeth whitening efficacy, comprehensively protecting your oral health.

- Vitamin B2 will effectively eliminate the mouth, lips, tongue inflammation and promote the metabolism around the gums, thus protecting the dental health.
- The friction of hydrated silica in the hydrated silicon whitening factor will carefully wipe dirt on the teeth surface and whiten the teeth, mildly and not to harming the enamel.
- The specially added ingredient Xylitol prevents *Tooth decay*.

# V-SHINE WINSMILE ANION & MINERAL SALT TOOTHPASTE

- 
- Anions forms a layer of protective film on the teeth surface, preventing each tooth from the bacterial erosion, thus effectively preventing gingivitis, periodontitis, gum swelling, bleeding gums and other oral problems.
- Anions act in the oral cavity to protect teeth for long time, protecting teeth and strengthening teeth.
- Winsmile Anion Mineral Salt Toothpaste contains a variety of natural plant extracts. – **what extracts??**

# V-SHINE WINSMILE ANION & MINERAL SALT TOOTHPASTE

- Contains NO sugar, Sodium fluoride and Diethylene glycol.
- Pure natural long-lasting fresh mint flavor provides a cool and refreshing taste in your mouth for a long period of time.
